Summary

Data native PM with **3+ years** of end-to-end product lifecycle experience across fintech B2B and enterprise security. At ION, built a customer health ecosystem from scratch for 3,000+ accounts across 15 products, **preventing \$10M in churn**. At AWS, led customer discovery and designed an AI-powered system that compressed **45-minute** IAM remediation to **one click**.

Education

Johns Hopkins University

Aug 2024 – Dec 2025

MS in Engineering Management

GPA: 3.93/4

Relevant Coursework: Product Management, Innovation & Design, Data Informed Strategy, Service API Design

Maharaja Agrasen Institute of Technology

Aug 2017 – Jun 2021

B.Tech in Computer Science Engineering

GPA: 3.74/4

Relevant Coursework: Agile Methodologies, Programming in Java, Computer Networks, Artificial Intelligence

Experience

JHU Center for Leadership Education, Baltimore, Maryland

Feb 2026 – Present

Strategy Fellow

- Single-handedly built a data ecosystem **increasing efficiency by 90%** by building a data system from scratch replacing manual excel workflows for admissions, student yield, course registration into a self-refreshing Power BI hub.
- Increased lead generation** and U.S. market visibility by conducting competitive research to uniquely position the MSIL program, translating insights into targeted engagement at SXSW and Alumni Showcase for 60+ prospective students.

Amazon Web Services, Seattle, Washington

May 2025 – Aug 2025

Product Manager Technical Intern, Identity Access Management (IAM), Security

- Architected a scalable & differentiated product to address **63k+** security findings by diagnosing a 3-month manual resolution bottleneck through **20** enterprise and SMB customer interviews, defining a roadmap that serves the full customer spectrum.
- Engineered a **97% reduction** in remediation time (**45 mins to 1 click**) by authoring a PRFAQ for an AI recommendation system, securing engineering sign-off on technical feasibility for prioritizing IAM findings on console and programmatically.
- Secured alignment from 12 stakeholders** on the end-to-end GTM and pricing for the recommendation system, establishing the pricing model, KPIs, and value proposition messaging to enable sales and product teams for market launch.

ION Group, Office of the Chief Customer Officer, Noida, India

Nov 2021 – Jul 2024

Strategic Insights Lead

Dec 2023 – Jul 2024

- Prevented \$10M in churn** by designing a customer health scoring model surfacing and prioritizing at-risk accounts based on customer feedback, annual customer value, renewal cycle, and upsell potential replacing excel sheets and word of mouth.
- Drove \$500k in new revenue** growth by executing data-driven go to market strategy to upsell components in the customer support portal leveraging customer segmentation, A/B testing and product usage analytics.

Growth Strategy Analyst

Jan 2023 – Nov 2023

- Centralized customer health data for **3000+ customers across 15 products** into a single Power BI master record for 35+ teams, connecting account management, delivery, and satisfaction signals to surface risk and retention insights.
- Captured **\$125k in cost savings** by upgrading the Voice of Customer platform from an external tool to an in-house product, owned end-to-end life-cycle from requirement gathering to launch, maintaining **4.8/5 CSAT** across 15 products.

Strategy & Operations Analyst

Nov 2021 – Dec 2022

- Conserved **100,000 man-hours annually** by building **20+ operational dashboards** used by **300+ people** to centralize real-time support data and Voice of Customer insights across ION's product portfolio of over 50 products.
- Slashed **high-priority case resolution time by 50%** and case volume by **20%** by partnering with **15 product owners** and Director of Support to identify resolution bottlenecks by data insights from the Customer Support Dashboard.

Projects

TacMed: Military Health Tech

- Increased battlefield documentation efficiency by **75%**, replaced pen-paper documentation with AI app with voice-to-text, AI injury mapping, and RFID/NFC transfer using Lovable, Figma, Whisper, and Python.

Biome: AI wellenss app (live on biome-rho.vercel.app)

- Shipped an AI companion** for women that adapts to hormonal energy cycles replacing streaks with self-compassion first UX, validated with 10 users identifying guilt loop as core insight, built on Claude Code.

Skills

Product: Roadmap, Prioritization, GTM Execution, Pricing, User & Market Research, Agile, A/B Testing, UX Design

Data & Analytics: SQL, Python, Power BI, DAX, Power Automate, Tableau, QuickSight, Excel, Data Modeling, RLS

Tools: Jira, Salesforce, AWS (IAM, CloudTrail), Figma, Claude Code, Lovable, Whisper, Confluence, Git, PowerPoint
