Education

Johns Hopkins University

Aug 2024 – Dec 2025

MS in Engineering Management

GPA: 3.93/4

Relevant Coursework: System Conceptual Design, Accounting & Finance, Data Informed Strategy, Service APIs

Maharaja Agrasen Institute of Technology

Aug 2017 – Jun 2021

B.Tech in Computer Science Engineering

GPA: 3.74/4

Relevant Coursework: Agile Methodologies, Programming in Java, Computer Networks, Artificial Intelligence

Experience

Amazon Web Services, Seattle, Washington

May 2025 – Aug 2025

Senior PMT-ES Intern, Identity Access Management, Security

- Architected a **scalable Gen AI-driven IAM remediation engine**, providing instant fixes for **63k+** average security findings per client, surfacing a 3-month manual resolution bottleneck through **20+** enterprise customer and SA interviews.
- Slashed access vulnerability remediation time by over **97%** (45 mins to 1 click) by prototyping an **AI-first** solution using **Bedrock**, built UX mockups in Venue.aws; securing engineering sign-off on technical feasibility for prioritizing IAM findings
- Spearheaded an end-to-end **GTM strategy** and pricing model for the remediation engine, establishing key KPIs and value proposition messaging to enable sales and product teams for market launch; aligned over **12 stakeholders**.

ION Group, *Fintech, serving banks and financial institutions*, Noida, India

Nov 2021 – Jul 2024

Data Systems Consultant, Office of the Chief Operational Officer, ION Corporates

Dec 2023 – Jul 2024

- Prevented **\$10M** in churn by designing a **customer health scoring model** to surface at-risk accounts based on annual customer value, renewal cycle, and upsell potential; integrated **20+ data sources**, replacing Excel sheets & word-of-mouth.
- Centralized customer health data for **3000+ customers across 15 products** into a single Power BI master record for **35+** teams, connecting account management, delivery, and satisfaction signals to surface risk and retention insights.

Growth Strategy Analyst, Office of the Chief Operational Officer, ION Corporates

Jan 2023 – Nov 2023

- Drove **\$500k in new revenue** by leading pre-sales GTM strategy for the customer support portal, equipping sales teams with **customer segmentation, A/B testing insights, product usage analytics** to identify close upsell opportunities.
- Captured **\$125k in cost savings** by architecting and deploying an in-house Voice of Customer platform, migrating from an external tool, owned end-to-end life-cycle, maintaining **4.8/5 CSAT across 15 products**.

Strategy & Operations Analyst, Corporate Strategy

Nov 2021 – Dec 2022

- Conserved **100,000 man-hours every year** by building **20+** operational dashboards used by **300+** people to centralize real-time support data and Voice of Customer insights across ION's product portfolio of over 50 products.
- Cut high-priority case **resolution time by 50% & case volume by 20%** by diagnosing resolution bottlenecks through data insights from the Customer Support Dashboard, aligning 15 product owners & Director of Support on tech solutions.

Projects

Biome: AI Wellness Companion — Tubi PM Builder Program

Mar 2026 – Present

- Built a **context-aware LLM** prototype in React (biome-rho.vercel.app) using Claude API, dynamically injecting hormonal phases, historical check-ins, & physiological constraints to predict energy levels & generate personalized recommendations.

TacMed: Military Health Tech — NATO

Jan 2025 – Apr 2025

- Engineered a **real-time speech-to-intent pipeline** using Web Speech API and GPT-3.5-Turbo to parse unstructured battlefield speech into structured, schema-compliant TCCC fields; cutting documentation time by **75%** in field simulations.

LLM Research — JHU CS Department

Jan 2026 – Present

- Architected and evaluated an **end-to-end LLM pipeline** that extracts user preference profiles from X feeds and likes data to power an **algorithmic personalized feed curation system**, analyzing complex behavioral datasets to optimize alignment between algorithmic and interest-based content delivery.

Agentic Digital Twin

Jun 2026 – Present

- Building a **context-aware agentic RAG system** using the **Claude API and React**, utilizing a **multi-step reasoning framework and tool orchestration layer** to ingest multi-source professional knowledge, retrieve dynamic context, and automate complex architectural design decisions.

Skills

Product: Roadmap, Prioritization, GTM Execution, Pricing, User & Market Research, Agile, A/B Testing, UX Design

AI: Claude API, Codex, Prompt Engineering, Azure OpenAI, LLM Evaluation

Data & Analytics: SQL, Python, Power BI, DAX, Power Automate, Tableau, QuickSight, Excel, Data Modeling, RLS

Tools: Jira, Salesforce, AWS (IAM, CloudTrail), Figma, Claude Code, Lovable, Whisper, Confluence, Git, PowerPoint
